

RAÚL MARTÍNEZ

+52 55 7490 8700 - Malaga Sur 17 , Mexico City - raul200402@outlook.com

Recently graduated engineer with experience in back-end development, data analysis and processing with Python, API design, and database integration. Experience includes projects focused on metrics analysis, report automation, and digital solutions development. Seeking opportunities in data analysis, technical support, and quality assurance where I can contribute a solid technical foundation, attention to detail, and the ability to work systematically with information and systems.

SKILLS

- Python
- Power BI
- Figma
- SQL
- C#
- Unity
- Excel
- Django
- GitHub

EXPERIENCE

Web System Operator

Latamco y Estrategias Creativas

2026- Present

Company dedicated to creating applications for promotions at Cinépolis and Coca-Cola.

- I monitor user activity through a dynamic platform, which shows the number of entries, weekly scores, the provinces with the most activity, among other things.
- Prepare weekly reports showing the metrics mentioned above.

Data Science Assistant

LUYOA

2025

Startup that offers digital loyalty cards for smartphones, without the need to download an application.

- I developed Jupyter notebooks to obtain relevant KPIs for the client, facilitating performance analysis and tracking of key metrics.
- I cleaned databases to remove sensitive customer information, contributing to secure handling and preparation of data for analysis.

Backend Developer

iOS Development Lab UPMX

2024 - 2025

I collaborated in the development of ConnectUP, an application aimed at facilitating the management of data and classes for collaborators of Universidad Panamericana.

- I supported server programming and database integration with APIs created in Django REST Framework, strengthening the application's back-end functionality.
- I worked in coordination with other development areas to support the connection between APIs and front-end interfaces, improving the project's technical collaboration.

ACADEMIC BACKGROUND

- Universidad Panamericana, Master's Degree in Engineering 2025 - 2026
- Universidad Panamericana, Specialization in Engineering and Project Management 2024 - 2025
- Universidad Panamericana, Information Technology and Intelligent Systems Engineering 2020 - 2024

ADDITIONAL TRAINING

- Santander Open Academy, Cybersecurity Fundamentals 2026
- Santander Open Academy, Power BI 2026
- Universidad Panamericana, Diploma in Data Science 2025

ADDITIONAL INFORMATION

- Languages: Spanish (native), English (advanced), Portuguese (basic)
